

Day & Ross

Flatbed Service

Overview

Does your freight need to be crane loaded? Do you ship to a farm, a construction or drilling site? Is your freight wider than 8'6" or over 13'6" tall? Does it weigh up to 68,000 lbs (within Canada) or up to 42,000 lbs (to or from the U.S.)?

Then, flatbed shipping is the best option for your freight. Depending on your requirements (load capacity, size, delivery timelines), Day & Ross sales professionals will work with you to recommend one of the several types of flatbeds, such as tandem flatbeds, tridem flatbeds, or extendable flatbed trailers, whichever best suits your cargo.
